

## ***Early Career Ag Risk Managers Program***

### **Invitation**

Have you been working as an agricultural risk manager for five years or less? If yes, a unique event is specially designed for you. We encourage you to register for the ASHCA 2020 Agricultural Safety Summit 'RAISING SAFETY' ([www.ashca.org](http://www.ashca.org)) and attend a special pre-conference event for people like you who are charged with safeguarding the agricultural workforce. ASHCA will be hosting an ***Early Career Ag Risk Managers*** networking opportunity – at no extra charge to Summit attendees.

**Bally's of Las Vegas**  
**Wednesday, March 18, 2020**  
**4:00 – 6:00 pm**

At this session you will be introduced to several experienced risk managers, representing various types of agricultural enterprises across the U.S. You will receive information on relevant organizations and training resources. And, if desired, you will be matched with a “seasoned” risk manager/safety professional who has experiences relevant to your management responsibilities. This networking may help you get the most out of the Summit event and open doors for identifying and addressing safety issues in the future.

### **Goal**

In support of ASHCA's mission "*to proactively address ongoing and emerging occupational safety and health issues affecting U.S. agriculture*" the Early Career Ag Risk Managers Program strives to mentor early career agricultural risk managers that are serving the growing and ever-changing agricultural industry. In so doing, the culture of safety will be strengthened as experiences and programs are openly shared by seasoned practitioners (mentors) so they may be effectively utilized by individuals eager to learn and apply safety principles and develop programs in their own production settings.

**If you are interested in attending this networking session and, potentially, participating in this program in the future, please let us know **NO LATER THAN FEBRUARY 28<sup>th</sup>**.**

**RSVP to Dennis Murphy at [djm13@psu.edu](mailto:djm13@psu.edu)**

*ASHCA – The Agricultural Safety and Health Council of America was founded in 2007 as a 501c (3) organization established to pursue national strategies to create a less-hazardous work environment and establish an industry-wide culture of safety for American agriculture. ASHCA's mission is to proactively address ongoing and emerging occupational safety and health issues affecting everyone engaged in all facets of U.S. agriculture.*
